

SOFTSHADE

DUO ROLLER BLINDS

CONTEMPORARY SHADING

Merging the structure of woven and sheer fabrics, Softshade presents a collection of elegant duo roller blinds.

Sophisticated fabrics in a selection of enhanced textured weaves and exclusively woven jacquards perfectly combine with delicate sheer voiles to create a soft light experience.

THE COLLECTION

SOURCE

Bursting with personality and colour, choose from 20 fabrics in neutral tones through to vibrant bright colours. Source is the perfect contemporary choice to create a stunning focal point in any room.

OPTIC

Adding texture to the weave, a delicate linear pattern adds a subtle dimension to this fabric in a range of eight neutral colours.

ORB & GEO

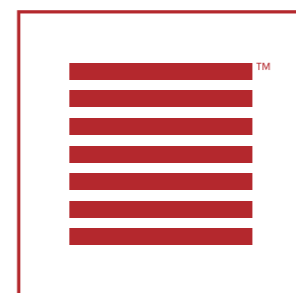

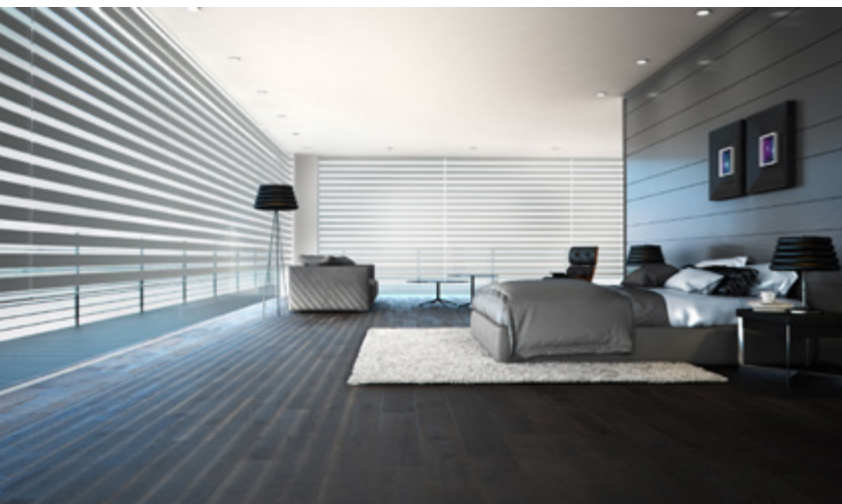

Intricacy and detail personifies the two jacquard duo roller fabrics. The smooth contoured lines of Orb introduce softness to the horizontal duo roller chic, whilst the prism design of the Geo collection gives a dynamic feel. Both ranges are available in four neutral colours.

RHYTHM

Classic duo roller style is presented in six urban colours. The linear detail woven into the sheer gives an additional dimension to the range.

MONSOON

Exotic in look, the refined texture of the natural weave brings a wood inspired aesthetic to the interior.

SOFTSHADE

Softshade roller blinds present two layers of intricately woven luxurious fabrics that move simultaneously for desired and precise light control. Easily operated in the same way as a traditional roller blind, the fabric layers can be positioned smoothly to offer a view to the exterior or positioned for complete privacy.
